Your Medications

As part of your healthcare at the weCHC, your Physician or Nurse Practitioner may prescribe medications. It is important that you understand your medications and keep your medication record up to date. We encourage you to ask your Physician or Nurse Practitioner to review all your medications to see if any can be stopped or reduced.

Refills: You may be prescribed a medication that includes one or more refills. If you are running low on your medication, we ask that you contact your pharmacy at least **7 days in advance** for a refill. This will enable your Physician or Nurse Practitioner to receive, review and approve the refill request in a timely manner.

It is important to not wait until you have run out of your medications when contacting the pharmacy. We want to ensure there is no interruption in your healthcare and therefore, providing enough notice avoids any potential risks and keeps your healthcare on track.

Controlled Medications: Controlled medications, such as narcotics, treat certain health conditions. In the event that you are prescribed a controlled medication, you will be asked to sign a contract by your Physician or Nurse Practitioner. This contract sets out the rules for the use of these medications.

5 QUESTIONS TO ASK ABOUT YOUR MEDICATIONS

4. MONITOR?
How will I know if my medication is working, and what side effects do I watch for?

5. FOLLOW-UP?
Do I need any tests and when do I book my next visit?

Keep your medication record up to date.

Remember to include:

- ✓ drug allergies
- ✓ vitamins and minerals
- ✓ herbal/natural products
- ✓ all medications including non-prescription products

Ask your doctor, nurse or pharmacist to review all your medications to see if any can be stopped or reduced.

You can change your consent preferences or withdraw your consent for the collection, use and disclosure of any or all of your personal health information, at any time (see contact information below). It is important to note however that when you change or withdraw your consent, it will not have a retroactive effect; it may have implications to you and it will not affect the collection, use and disclosure of personal health information where such collection use and disclosure is permitted or required by law without consent.

UPDATES

We may update this statement from time to time and encourage you to refer back to it regularly. This statement is current as of the "last revised" date which appears at the top.

**THANK YOU FOR READING OUR PERSONAL HEALTH INFORMATION
PRACTICES STATEMENT!**

“Demographic” means information collected about a group of people that helps to describe them.

- We want to learn about our clients and their unique needs
- This information helps us shape client experience and outcomes

This information includes: language, racial group, disability, sexual orientation, gender, income, length of time in Canada

Why are you asking me these questions?

So we can provide excellent care and remain aware of discrimination and correct any issues that may arise.

Is it legal to ask these questions?

Yes, Ontario Human Rights Commission encourages organizations to collect and use demographic information to keep track of outcomes and promote equity. Ontario's Excellent Care for All Act, 2010 is a law that holds hospitals responsible for delivering quality health care. This law has health-care organizations collect information from patients and clients about their experience.

How will you use this information?

We want to learn more about our clients' demographics and their health outcomes. We will use information to develop programs and offer service training. Members of your health-care team may offer supports and services including: interpretation services, health information, treatment or care options, and accommodations

Who can see my demographic information?

- This information will be visible only to your health-care team and protected like all your other health information.
- If used in research, the information from all patients and clients will be combined and researchers will not be able to identify who any of the patients and clients are.

I'm only here for a quick appointment. How is this relevant to my care?

This information will help us plan care not only for your future visits, but for other patients and clients who may have similar needs as yours.

What if there are questions that I don't want to answer?

You can answer “prefer not to answer” to any or all questions. This will not impact the care you receive.
